DEDEM MEKATRONIK

We handle it!

**Science Based Targets Commitment Statement**
*(SBTi Commitment Statement)*

**Date:** 04.05.2026

As Dedem Elektrik Taahhüt Otomasyon Elektronik San. ve Tic. A.Ş., we recognize the importance of efforts aimed at reducing greenhouse gas emissions in the fight against climate change. In line with our sustainability approach, it is aimed to develop the necessary infrastructure studies for monitoring, evaluating, and establishing long-term greenhouse gas emission reduction targets.
Within this scope, our company commits to evaluating science-based emission reduction targets in accordance with the criteria of Science Based Targets initiative (SBTi) and carrying out the necessary preparatory activities for this process in the coming years.

During this process, our company aims to:

- Develop the infrastructure for calculating corporate greenhouse gas emissions,
- Monitor emission data in a more systematic manner,
- Support energy efficiency and sustainability practices,
- Conduct the necessary assessment and preparation activities for science-based target-setting processes.

These activities are planned to be evaluated within the framework of our company's medium-term sustainability roadmap.
Sincerely,

DEDEM MEKATRONİK
