DEDEM MEKATRONIK

We handle it!

**Our Environmental Sustainability Commitment**

**Date:** 04.05.2026

Our company recognizes reducing the environmental impacts arising from its activities, supporting the efficient use of natural resources, and integrating a sustainable production approach into all business processes as one of its core responsibilities.
In this direction, we carry out activities to reduce energy consumption, promote waste segregation at the source and recycling practices, develop environmentally friendly processes, and ensure full compliance with environmental regulations.

We support improvement initiatives aimed at reducing greenhouse gas emissions and continuously monitor our environmental performance to achieve ongoing development. At the same time, we organize awareness activities and training programs to enhance the environmental consciousness of our employees.

Together with our suppliers and business partners, we aim to strengthen the culture of sustainability and contribute to leaving a more livable world for future generations.
In line with our continuous improvement approach, we consider environmental sustainability not only as an obligation, but also as an important part of our long-term corporate responsibility.
